Experience

Felitech Solution/ Backend Developer

November 2024 - Present

● Developed and maintained the backend for the company's portfolio website.

● Built scalable and efficient APIs using Node.js andNest.js

● Integrated and optimized databases such as PostgreSQL

● Implemented authentication and authorization using JWT

● Enhanced backend performance while ensuring security best practices.

EventPlanner Project/ Full Stack Developer

January 2025 - Present

● Designed and developed a responsive and user-friendly event management interface using React.

● Implemented state management using React Hooks and Context API for seamless user interactions.

● Integrated API calls to fetch and display from own written JSON event data dynamically.

● Optimized UI/UX by improving accessibility, aos animations , and overall performance.

● Ensured cross-browser compatibility and mobile responsiveness using vanilla CSS and Bootstrap.

Decor System / Freelancing

May 2023 -October 202

Frontend Development: Leveraged HTML, CSS, and JavaScript to build a clean,

intuitive UI, enhancing the user experience through a

responsive design that adapts smoothly across devices. Integrated Bootstrap and CSS Flexbox/Grid for layout consistency and

responsiveness.

Interactive Components: Implemented user-friendly, interactive components using modular JavaScript and React for a more dynamic and

engaging user interface. Utilized npm packages to streamline the development of common UI elements, improving navigation and workflow.

Backend Development: Designed and managed backend architecture using Node.js and Express, creating a RESTful API to handle data

management and user authentication securely. Integrated with MongoDB for efficient data storage and retrieval.

Version Control & Deployment: Used Git and GitHub for version contro
